

“Crowdfunding for Climate Change”

Oliver Gajda
Chairman
European Crowdfunding Network AISBL

EUROPEAN
CROWDFUNDING
NETWORK

What we have done so far !

What we are working on right now !

Some partners:

CITIZENERGY – European Citizens for Renewables - will create a new European online platform for citizen investments in renewable energy source (RES) projects. Its goal is to boost effective citizen engagement and investment in renewable energies, and to set up a European network on citizen RES policy, bringing together relevant citizen energy initiatives. www.citizenenergy.eu

What we are working on right now !

Some partners:

ACCELERACE

STING
STOCKHOLM INNOVATION & GROWTH

AGRO
BUSINESS
PARK

FI-WARE
ACCELERATOR

Pan-European consortium accelerating “Future Internet-” related business ideas, start-ups and small and medium-sized enterprises active in **smart cities**, **cleantech** and **agri food** by providing coaching, office space (Amsterdam, Copenhagen, Stockholm, Hamburg) and €5.5 million for at least 100 startups in open application grants. www.speedupeurope.eu

The state of renewable energy funding !

- Since the adoption of the RES Directive in 2009 and its 'Energy Roadmap 2050', the EU has experienced significant growth in renewable energy reaching an overall renewable energy share of 13% of total energy consumption in 2011.

Why we are engaged in Climate Change !

- There is evidence that when part of the public become investors in renewable energy projects the sense of ownership grows and public opposition is reduced.

What we need to work on !

- sustained public acceptance of renewable energy;
- involving stakeholders across sectors;
- harmonized renewable energy policies and legislation;
- capacity building and innovative financing schemes;
- speedy and user friendly procedures

Thank you !
